

I am asking that you do not let the LPFM service take priority over the already existing FM service already in place. My KLOVE station would be jeopardized as it is a national broadcast. It is of public interest in my area because there are very few stations on air that can serve in so many ways on & off the air in all the areas where they broadcast. A recent rain storm interrupted service for 2 days and I as lost without the encouragement that it brings me every day. The reception is strong in areas, and weak in other areas, so if LPFM is able to take over the air waves, I would lose my station completely. PLEASE DO NOT LET THIS HAPPEN!

THANK YOU AND GOD BLESS YOU!!
